

NOT JUST A BOX TO STAND ON

AliSafe offers two basic types of access angles on our platforms. While the actual angle will change slightly depending on the height of the platform, the images below will give you a better understanding of each.

The process from enquiry to delivery;

- Alisafe will walk you through a few simple steps to ensure your platform is designed to meet the needs of your staff and be fit for the task.
- Alisafe will meet and surpass the relevant standards and other regulations.
- Through years of experience, designing and manufacturing platforms, we know what is acceptable and what isn't, especially when safety is paramount.
- At Alisafe we understand the importance of safety on-site by providing an operational manual for the use, maintenance and storage of your platform.

As you can see, there is a lot more to the process than just supplying you with a box to stand on. We understand that quality and product design play an important role when it comes to safety. AliSafe is a leader in the design of work platforms –we meet and surpass all requirements of the relevant Australian Standards and will ensure that your platform meets any other requirements you may have.

Again, thank you for enquiring about an AliSafe platform and we look forward to providing you and your business a top-quality platform as well as exceptional customer service.
